

## **Amerex Data Introduces New Indicative Data Web Service**

### **For Immediate Release**

HOUSTON, August 23, 2006 –Amerex continues to provide cutting edge technology and services to its customers by making market data available through a web service. End-of-day indicative natural gas and power data produced by Amerex are quickly becoming the industry standard. “Customers may still receive data in Excel or .csv format via e-mail, but we expect the majority of our clients to be overjoyed by the added benefit of this new service,” says Amerex Senior VP, Mike Prokop. Subscribers will be able to electronically interface with the Amerex Price Database, extract data from Amerex, and port it directly into their settlement systems. Companies will no longer expend resources manually typing prices into their portfolios each day. Amerex natural gas data currently offers 61 locations and tenors to 2013. Amerex electric power data currently offers 112 instruments and tenors to 2015. For more information and a one-week free trial of Amerex Data please visit [www.amerexdata.com](http://www.amerexdata.com) or call Mike Prokop at 281-340-5290.
